ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: BACKFLOW PREVENTION CAP FOR PANELS HAVING INTERLOCKING FOLDS

(57) Abstract: A backflow prevention cap for panels having
interlocking folds, which prevents a backflow of water into seamed
panels through fine gaps between the interlocking folds of the seamed
panels by wind action. Each of panels has a tetragonal panel body
(7), outer interlocking folds (9) provided by folding outwardly two
neighboring sides of the panel body, and inner interlocking folds (11)
provided by folding inwardly two remaining sides of the panel body.
The backflow prevention cap includes a water shielding part (3) having
a sheet-shaped wedge structure to be installed in the top ends of the
outer interlocking folds (9) of each panel and supported in the top ends
of the outer interlocking folds (9) by a locking means when the panels are
continuously seamed together through a fold-interlocking method.
